Nowadays it's the era of development of technologies and technologies are developing like day by day in a vast form and with this technologies Animation has grown into a great level which we can't imagine. There isn't a single film where animation is not used... and If you are studying animation you will definitely understand the necessity of animation in production field not only a live action movie but also every advertisement company hire some VFX artist, 3D Modeler, graphics designer, Audio Video Editors, and Computer experts. So now animation is growing day by day and by which we can get instant results of our daily thinking.

As a part of this CE/IT department arranged awareness seminar on 17th March, 2018 by MAAC (MAYA ACADEMY OF ADVANCED CINEMATICS) is the media & entertainment education brand of Aptech. Through its wide network of centers, MAAC has prepared thousands of students for careers in 3D animation, VFX, gaming, web, graphics design, and media & entertainment. They gives the valuable guidance to the more than 200 degree and diploma students of CE,IT and Mechanical department about animation and makes student aware about what would be the role of this in future.
